.com Can anyone help me with a problem with photoshop that I'm having. I have used photoshop for many years on my macs (later on a wintel pc, vista and osx) without problems and have done all my most important graphics in it now. I have to use a much smaller and less powerful pc, but I still have it. I get into photoshop and everything seems to be fine. Then when I save the image I don't seem to get any progress. There is nothing happening in photoshop and nothing appears in the photoshop window. I have tried restarting photoshop and my pc and rebooting my pc, nothing. I have also tried

selecting 'Save As' in photoshop and just save as, again nothing and the photoshop window doesn't even appear. I have also tried a 'GIMP' image, same problem. Any ideas?
