The now discontinued "AutoCAD LT" (long term) and "AutoCAD Classic" (former "version 2") applications were based on an older version of AutoCAD called "AutoCAD 2D," which in turn was based on AutoCAD. The original AutoCAD 2D used an internal 3D modeler and was the first version that could be used with a PC. The 2D format, which was known as the "Programmer's Edition," featured a number of limitations compared to the original AutoCAD, including only one output format and a smaller user interface that was text-only. First product with a programming language CAD is the term for a group of computer-based systems used to design and analyze the 3D geometrical shape of an object. Common types of CAD include orthographic or "isometric" projection models and

computer-aided design ("CAD") models and "engineering" drawings. CAD drawings are typically rendered in 3D formats such as CAD/CAM, CATIA and PLM. AutoCAD is used for 2D and 3D design and drafting of architectural, mechanical, plumbing, and electrical designs. CAD is the most commonly used software package for design and drafting tasks in the fields of architecture and engineering. Adobe Illustrator is a vector graphics editor used for drawing illustrations and photographs. The program can be used to draw vector images on paper, plastic, and other surfaces, and can also import, edit, and manipulate existing raster images. Illustrator is especially useful for drawing logos, icons, and other types of graphics that are not compatible with raster images (bitmap images). Communications and collaboration software Groupwise is a unified communications suite from Microsoft for businesses, available as a standalone program or as an integrated part of Microsoft Office. It has the ability to integrate a wide variety of communication and collaboration tools into a single system. It was first released in January 2003 as GroupWise 8.x, based on Microsoft Windows 2000 Server and GroupWise 5.x. In November 2003 Groupwise 7.0 was released and included an embedded version of the Office Document Imaging Protocol (ADIP). At the same time, Microsoft published the first version of the embedded ActiveX control, Microsoft ActiveX Document Imaging Protocol (ADIP). Also in November 2003, Microsoft released the Groupwise SDK as open-source software. Groupwise 9.0 was released in February 2005.
