# Download Drivers Notebook Acer Aspire One Kav60 !!LINK!!

since i have a small windows and linux pc at home, i didn't have any way of installing drivers when i got my netbook, so i had to go to a friend's house and ask him to hook it up to his windows xp pc. i was able to use the windows drivers for the netbook, but they weren't exactly what i was looking for. i didn't want a hardware compatibility list, i wanted to know how to install the latest drivers from acer. the acer aspire one netbook kav10 is a tiny netbook with a lot of features. it has an intel atom processor, which is a really low-power processor for a netbook. what's great about it is that it comes with a full hdmi port, a bluetooth radio, and an sd slot. it also has a 100gb hard drive, which is much larger than the typical netbook. it also has an 8 megapixel camera on the back and a 2 megapixel camera on the front. when i first got it, i was really impressed.

---

unfortunately, most drivers won't install on it. when i first got my netbook, i had a friend hook it up to his pc and i was able to use the windows drivers. i didn't know this at the time, but those drivers were pretty old. acer has released newer drivers for the netbook, and they are available to download. since i didn't have any way to install the drivers on my netbook, i needed to figure out a way to install them. luckily, the acer website has a list of all of the hardware compatibility for the netbook, and you can download a utility that will install the right drivers for your netbook. the utility is called mbr wizard, and it is available for windows xp, windows vista, and windows 7.
