Using new NVIDIA® Quadro FX 3600M graphics card, AvoDesign 3.1 takes full advantage of this multi-core card for designing CAD products at stunning speed. For the latest CAD product design software, AvoDesign 3.1 is faster than ever with the help of NVIDIA® Quadro FX 3600M graphics card. With the built-in multi-core architecture, the new NVIDIA® Quadro FX 3600M graphics card creates beautiful, seamless curves with ultra-fast operation, even under high-resolution file sizes. AvoDesign 3.1 also features NVIDIA® CUDA™ support, enabling you to see the full potential of NVIDIA® Quadro FX 3600M graphics card with a new game – building CAD products more than ever before! Using NVIDIA® Quadro FX 3600M graphics card also brings high-performance 2D drawing features, such as vector-based editing, true-to-scale scaling and anti-aliasing. So, whether you are creating CAD drawings, web sites, logos or any other vector graphics, you can expect to see a dramatic speed-up in the resolution of your designs, and an increase in the quality of the output. Packed with revolutionary enhancements, AvoDesign 3.1 also offers the most feature-rich features, such as improved DWG support, path creation and B-Rep optimization, plus numerous other enhancements to its design application. The user-friendly design application makes it easy to collaborate with a team, and bring your design to life

with even more powerful and efficient graphics tools. Additional features of AvoDesign 3.1 · Enhanced multi-core NVIDIA® Quadro FX 3600M graphics support · User-friendly design application with improved collaboration tools · Support for PDN (*.pdd), FBX (*.fbx), ACIS (*.acis), and CDM (*.cds) formats · New features including unique Dynamic Draw Pad functionality and support for interactive style sheets · Dynamic Paths (B-Rep), reduced memory and 2D vector editing · Vector-based drawing in AutoCAD®, DWG, and DXF formats with true-to-scale editing capabilities · Extensible user-defined drawing style sheets (CADML) · Improved PDF generation · Numerous bug fixes and enhancements Next-generation Turbo Cache features The new Turbo Cache technology has been developed in partnership with Intel®. It improves the cache performance by taking advantage of the processor's unique architecture. Turbo Cache

K-3D 3.0.0 is a complete 3D modeling and rendering application featuring robust features, a sophisticated toolset and intuitive user interface. K-3D is a powerful 3D application that combines RenderMan and OpenGL rendering with an easy to use interface and numerous objects, textures and materials. K-3D is a free 3D modelling and rendering application featuring robust features, a sophisticated toolset and intuitive user interface. With support for multiple object types and customizable render engines, K-3D can be easily used in both personal and commercial environments. App Features: * Easy to Use Interface K-3D's interface has been designed from the ground up and is relatively easy to use, yet functional enough to offer a great deal of power when needed. The interface can be customised and driven using a simple scripting system to tailor it to your exact needs. * Flexible Modelling Interface The modelling interface can be used in a variety of ways and offers a large number of tools to manipulate and transform an object. * Document Interface The Document interface is used to view and work on the mesh files used to store the geometry of an object. * Simplified Interface K-3D has been designed with an interface that is simple to use, yet offers an extensive set of features that are easy to understand. * Support for Multiple Objects K-3D's object selection interface supports working with a wide variety of objects, including boxes, cones, spheres, boxes and cylinders. * Complete File Import/Export Import and export of custom objects is simple and includes multiple file formats. * Multi-Language Interface The interface can be driven in a large number of languages, including English, French, German and Italian. * Controllable Paint Tools Paint tools can be controlled using a simple scripting system, allowing an almost infinite level of customisation. * Selectable Toolbar The toolbar can be customised using the script system, including the addition of new functions or changing the set of tools available. * Multiple Render Engines RenderMan and OpenGL are supported by K-3D, making it possible to render multiple objects at the same time. * Light Detection The light environment is calculated using a fast real-time algorithm, enabling the accurate simulation of the light source for the objects being rendered. * 3D View-Port The 3D view-port allows you to view and edit 3D objects in any perspective and

The most important thing is if we go from here to the World Cup in Brazil and the way we play, I think that is the most important thing. I just have to find a way to do that, to go there and to play good football and to show my form and to play well. I'm still young and I'm still learning a lot every day, every training session, I am feeling very good and I have a

lot of belief and confidence in the team and the coach. There are a lot of possibilities and I'm happy with the way I'm playing. But we have to work very hard and we have to do that every day to be in the best shape possible, because it will be a very difficult tournament. We'll see."
